Introduction to Data Analysis with R

Day 1: Welcome to the workshop

Selina Baldauf

Freie Universität Berlin - Theoretical Ecology

October 1, 2025

Who am I?

💻 **Scientific programmer** @theoretical ecology group

🎓 PhD in **dryland ecology**

👩‍🏫 **Teaching** R, Git, good scientific practice, …

I'm using R a lot for ...

… **data analysis**

… ecological modelling

… writing documents/websites/presentations

…. workflow automation

…

Who are you?

What are the molecular basis of **learning and memory in the brain**?

Is this newly developped **sample preparation** technique suitable for use in **clinical diagnostics**?

Biophysics

How do **neurons connect** to their partners?

Biochemistry

Behavioral economics

To study the **biofilm formation** process in flow by analyzing the fluorescent images

Environmental ecology

Structure and Function study of the **Glycogen Debranching Enzyme**

Department of Economics and Government of Agriculture, Food and Natural Resources

The impact of tripartite interactions among host immunity, microbiota, and pathogens on **pathogen virulence evolution**

How can biochemical markers and comparative methods contribute to the monitoring of **ash dieback in Germany**?

The effect of community diversity on **bacterial spatial patterns in the phyllosphere**

Who are you?

Which tools did you use for data analysis so far?

13 responses

Tool	Count
Excel	9 (69.2%)
R	2 (15.4%)
Python	3 (23.1%)
Prism	2 (15.4%)
SPSS	3 (23.1%)
origin	1 (7.7%)
Image J	1 (7.7%)
Origin, graphpad	1 (7.7%)
I use R and python but I wasn't…	1 (7.7%)
MatLab	1 (7.7%)

Who are you?

Which of the following data analysis methods do you use regularly?

13 responses

| Method	Count
Descriptive statistics	7 (53.8%)
Statistical tests (t-test, ...)	5 (38.5%)
Linear models	5 (38.5%)
Generalized linear models (glms)	1 (7.7%)
Visualization (scatter plots, box…)	10 (76.9%)
linear regression	1 (7.7%)
QGIS	1 (7.7%)
Spatial statistics	1 (7.7%)
Workshop topics

Image adapted from Wickham & Grolemund: R for Data Science

Day1 Introduction to R and RStudio and data import

Day2 Data transformation and visualization with the tidyverse

Day3 Cleaning data, statistical tests, good practice and AI tools

Day 4 Bring your own data

Day 5 Bring your own data + Q&A (optional)

Schedule and Organization

📅 03.03.2025 - 04.03.2025 from 🕐 9 a.m. - 4 p.m.
📅 10.03.2025 - 11.03.2025 from 🕐 9 a.m. - 4 p.m.
📅 17.03.2025 🕐 9 a.m. - 12 a.m.
🍜 ~ 12 a.m. - 1 p.m., ☕ in between
📌 We will meet in the `General` meeting on Webex

1. Input sessions

- Presentation and demonstration of a topic + examples

2. Tasks

- Solve them in small groups

3. Joint discussion of tasks & questions

Material

- All material can be found on the workshop's website
    - Presentations, Tasks, Solutions, Additional resources
- You can download slides and R Scripts from there
- Website will stay online after the workshop

Bring your own data

On the last workshop day, you can **work with your own research data**. I will also provide some **real life data sets** from different topics.

Learning by doing

- Get started using R for your own analyses

- Use any of the methods from the course or try new things, …

- Present/discuss your results, questions and problems at the end of the day

- Add your name and some details on what you plan to do in this joint table

Before we get started I

- **Help each other** if possible

- Have an eye on the chat and on the time

- All questions and comments are welcome

- If possible, please turn on your camera

- Feedback is welcome (Evaluation at the end of the workshop)

Before we get started II

Did anyone have problems installing R and RStudio?

Download and install R from https://cran.r-project.org

Download and install RStudio from https://www.posit.co

Before we get started III

How to use Webex teams

- `General` channel for our joint meetings and chat

- `Groups 1-4` for solving tasks jointly

  - Group spaces have their own chat and meetings

  - Ask questions in the chat, share screenshots, share your screen and talk

Now you (10 min)

Get to know your team

- **Go into your groups** and **start a meeting** there
- **Introduce yourself** to your team (2 minutes for everyone)
  - What is your PhD about?
  - Which tools did you use so far for data analysis?
  - Which types of data analysis do you need?
- **Come back to the general meeting** after 15 mins
